SKILLS

HTML | REACT | JAVASCRIPT | CSS | NODE | SQL | PHP

PROJECTS (See portfolio for more)

Next Round - Personally Developed

REACT | NODE | REDUX | GOOGLE MAPS - GEOLOCATION, GEOCODING | SASS | SQL | EXPRESS |Authentication(Bcrypt)

Nextround - allows users to find drink specials according to their geographical position. It provides a business with the ability to quickly create attractive ads for users to see.

- Google Maps- Geolocation to find the user, Geocoding to transform the address to coordinates to place down the markers.
- CocktailDB API - pulled in the information of hundreds of cocktails so business owners can choose from a list as they are creating an advertisement.
- SASS - First time using SASS and I loved it. Used mixins and inheritance to quickly apply style to components

Keep it Reel - Group Developed

REACT | NODE | REDUX | SQL | SASS | OMDB-API | Authentication(Bcrypt) | UnSplash API

Social Media site centered around movies. Users can search for any movie in the INDB and write a review. Users can like blogs, follow users, edit their post, and make comments on the posts.

- sUsed OMDb API to allow users to search for movies in the IMDB
